General	Define Infrastructure Projects and sub-projects	x																												
General	Support BIM IFC2.3 file uploads	x																												
BIM 3D	3D model vieweing for IFC (FLAT & XML) - (front end only)	x																												
BIM 3D	Single view of asset -- integrated view of information specific to an asset	x																												
Admin	Manage revisions with check-in and check-out - (front end only)	x																												
BIM Stat	Dashboard capability with custom report generation	x																												
BIM Exchange	Federated identity Manager support	x																												
BIM 3D	Slice and dice 3D models by different dimension		x																											
BIM 3D	Collaboration - message sharing at asset-level		x																											
BIM 3D	Reduce the opacity of the outer layer and navigate to the inner objects		x																											
BIM Alert	Rules management ability configure alerts		x																											
BIM Exchange	Model checking capability using building smart MVD coordination view V2.0		x																											
BIM Connect	Integration ability with various 3rd party system using API		x																											
BIM exchange	Upload and share BIM data with the entire team & 3rd party contractors		x																											
BIM 3D	Work with multiple BIM data (merge IFC files)		x																											
BIMaaS	Cloud offering, platform as a service		x																											
BIM exchange	4D; Intergrate and view cost information		x																											
BIM exchange	4D; Fault history of asset maintainence		x																											
BIM exchange	4D; Job tickets; of asset managment		x																											
BIM exchange	4D; Documents associated with an asset		x																											
	Compatibility for IFC4 (in Release 1.2)																													
	Compatibility for COBie																													
	Incorporating BIM Collaboration Format (BCF) for collaboration																													
	Custom Pluggable Model Checkers																													
	CDE - federated search functionality (lucine)																													
	Identity servers - user management (UI)																													
	Collision Detection Reports with 3D image snapshot																													
	Powerful, secure user management capabilities																													
	Exchange asset information with 3rd party contractors																													
	BIM Connect: integrate with other systems using Open API																													
	Powerful, secure user management capabilities																													
	security																													
BIM Exchange	export to .. (dashboard data should be exportable)																													
BIM Exchange	ESB																													
	Plot assets on google maps																													
BIM Exchange	user management support
